

# SMS PROJECTOR X MINI

A low ceiling height is not a problem.

Mounting the projector close to the ceiling makes it possible to use a projector even when the ceiling height is low. This projector bracket puts your projector right up close to the ceiling. It is then possible to mount and dismount the projector and slide with one hand.

The X-series is characterised by simplifying features and an attention to detail. Such as the ingenious cable holder where you can easily hide all the cables. Or the snap-on function for rapid mounting of the projector slide. The surface finish has also been given an extra coat.
